FEATURES React Stringer, 60/40 Double Rails, Slick Bulbs, Nose & Tail Bumper, Graduated Channels.

Mitch Rawlins VS Jarrod Gibson*

Graduating from an intense grommet hood spent in the public eye, Mitch has emerged as bodyboarding's hottest property. Whether paddling into massive Shipsterns or launching massive tow assisted airs, the 23 year old phenom is breaking new ground on the world's stage. With his exclusive line of signature boards, the VS Project is helping Rawlins take it to the next level.

An immensely talented shaping protégé, JG is the latest in a privileged line of buzz-tech trained craftsmen. Serving his apprenticeship at the 4play/ odyssey factory, Gibson's natural flair and attention to detail has seen him progress to the highest grade. As Rawlins' long-time shaper, JG was the natural choice for the 1st VS Project.

*Jarrod Gibson appears courtesy of QCS

THE VERSUS PROJECT

In 1999, Nick "Mez" Mesritz created NMD Stox. His mission was to design and shape a stock line of bodyboards with a custom board mindset, working with the best riders and best materials to give the modern day rider a truly high performance product.

During his formative years, Mez played a key role in the training of 4 prominent shapers. As an exclusive NMD project, Mez wanted to work with his friends in a capacity that would involve their shaping talents in a 'one on one' collaboration with the sports top riders.

VS is that project.

Pierre-Louis Costes VS Dan Sivess

French wunderkind, Pierre-Louis Costes, is bodyboarding's future. At 17 PLC is already dominating both the free surf and contest arenas, justifying his position at part of the elite VS team. As Riptide's 2006 Peer Poll "Best Grommet", PLC is on a mission to take down the sports big guns.

PLC's custom shaper, Dan Sivess, joins him in the project. Hailing from New Zealand, Dan has worked under Mez in his Indonesian facility for the past 5 years, paying his dues to become a world-class shaper in his own right. Together, Dan and PLC are part of bodyboardings new breed.

Ryan Hardy VS Todd Quigley

Widely respected as the dominant force in bodyboarding today, as justified by his 6 x number 1 placings in Riptide's Peer Poll, Hardy is the latest addition to the VS team. With a new quiver of VS boards hand-shaped by QCD master shaper, Todd Quigley, which sees the two continue a relationship that has virtually spanned Hardy's professional career, Ryan is stoked to be riding product that can assist him in his quest to take his first, long awaited, World Crown.

Quigley commented "Hardy is performance bodyboarding. There's no discussion necessary. I'm amped to be working with Ryan again and I'm focused on making our project something special. The VS Project will give us the opportunity to focus this knowledge into a range of boards that both Ryan and I can be proud of."
