

## Turbo Surf Designs

### TURBO IV - The New Original

Turbo Surf Designs are proud to introduce the Turbo IV "The New Original". The Turbo IV continues the legacy from the iconic Turbo III. The Turbo IV has the same legendary appearance as the Turbo III, though has been enhanced by the latest proven performance template and the innovative "FCS" core and tri-stringer system.

#### Core

"FRC" Flex Response Core. A revolutionary composite core providing the flex and recoil of a traditional PE core with the strength and lightweight feel of a PP core. You will be amazed!

#### Stringers

The revolutionary FRC core has been combined with a Tri-stringer system, the combination creates perfect structural flex.

#### Shape

Latest proven performance template, for prone or drop knee. The Turbo IV is only available with a crescent tail.

#### Slick

Nothing but the highest grade Surlyn(R), providing superior performance and recoil.

#### Deck

The highest quality non-crosslink 8lb PE decking.

#### Rails

50/50 Combo, yellow pin and red outside rail, using non-crosslink PE.

#### Channels

Twin performance channels.

#### Nose Bulbs

Placed in position beneath the slick to enhance finger grip.

#### Nose Piece

The Turbo IV would not be the same without its distinctive, Turbo stamped nose piece.

**Tail Piece** – Again we have retained the distinctive tail piece to the Turbo IV.

## TURBO Tips & Board Care

Your TURBO board has been made using the best materials available, it's up to you to take care of your board, and by following these simple instructions your board will last a very long time.

- Protect your board from excessive heat and direct sunlight.
- Always keep your board covered in a cool place.
- Do not leave your board in car exposed to the sun.
- Do not use your board as a seat.
- Do not drag your board over hard surfaces.
- Do not lean on or drop your board onto hard surfaces.
- Do not free fall with your weight on both ends of the board.
- Always wash salt water from your board after use.
- Do not ride up onto the sand or rocks.
- Repair any cuts with Silicon or similar sealant.
- Do not abuse your board in anyway.
- Over flexing in either direction will cause damage.
- Only enter the surf area if you are a competent swimmer.
- Do not encroach into the path of another surfer.
- Do not drop-in to a surfer already on the wave.
- Wear a pair of quality fins designed for bodyboarding.
- Always use a leash tethered to your board and arm in the correct way.
- Seal your leash plug with silicon to prevent water absorption.
- Never use your board as a sun shade.
- Be aware of stingers and sharks at all times.
- Follow instructions of lifeguards.
- Help other swimmers in distress.
- This board is designed for use by experienced swimmers and is not qualified floatation equipment for life saving.
- Respect the ocean and other surfers.

The above tips & care on using your board are mostly common sense, however it is important to have pride and etiquette when using your TURBO board.
